

Thank you so much for contacting me. As you say it's hard economic times. We will be addressing, a new way of expressing the creative Arts if elected. One that will create vibrant creative jobs for our community. This will fill a much needed area of visual design and create resources coming back into our communities.

This is the need recommended by our younger voters and creative jobs for our multicultural communities. I hope this helps you and I think we have a lot of painters here and sculptors who would love to provide their work and we can afford to promote them locally. It's very important to purchase art from Edmonton artists here and not buying outside of the region.

Thank you and I hope for your vote
